MUHAMMED YUSUF DEGERLI

Software Engineer | AI Systems & Full-Stack Development

Istanbul, TR | +90 545 868 2546 | yusufdgrl72@gmail.com | linkedin.com/in/yusufdegerli | github.com/yusufdegerli

PROFESSIONAL SUMMARY

Software Engineer skilled in low-level systems (C/C++), full-stack web architectures (Next.js, .NET Core), and cross-platform development (Flutter). Experienced in evaluating, benchmarking, and optimizing Large Language Models (LLMs) for complex code generation and algorithmic reasoning at SpaceXS (formerly xAI / SpaceX). Proven track record leading technical teams and delivering scalable production systems.

TECHNICAL SKILLS

Languages: C, C++, C#, Python, JavaScript, TypeScript, Dart, Kotlin, SQL
AI & Engineering: LLM Code Evaluation, Prompt Architecture, Algorithmic Benchmarking, Edge-Case Verification, Multi-threading
Frameworks & UI: Next.js, React, Svelte, .NET Core, Flutter, React Native, Jetpack Compose, Tailwind CSS
Databases & DevOps: PostgreSQL, MSSQL, Supabase, SQLite, Firebase, Docker, Kubernetes (k3s), Linux Shell, Git
Architecture: Clean Architecture, Microservices, RESTful APIs, WebSockets (SignalR), MVVM, MVC, OOP

PROFESSIONAL EXPERIENCE

Software Engineer – AI & Code Systems (Independent Contractor) — SpaceXS (Grok.com) **Dec 2025 – Present | Remote**

- Spearhead evaluation, debugging, and optimization of frontier AI/LLM models across complex software engineering tasks, focusing on algorithmic efficiency, system design, and UI/UX code synthesis.
- Architect multi-constraint coding prompts and benchmark suites in JavaScript, Python, and C++ to stress-test model reasoning and identify critical edge-case failures.
- Refactor AI-generated codebases to enforce Clean Code principles, optimal time/space complexity, and zero-dependency execution standards across production pipelines.

Full-Stack & Mobile Software Developer — Independent Software Consultancy **Jan 2024 – Present | Istanbul, TR**

- Architected and deployed 4+ cross-platform mobile and full-stack web apps using Next.js, .NET Core, and Flutter, achieving 95% code reusability and a 4.8/5 user rating.
- Engineered an online hotel reservation and channel management system integrating Next.js, Supabase, and hospitality APIs (Beds24, Channex) for automated real-time booking sync.
- Constructed real-time data features using SignalR and WebSockets, reducing response times by 60% compared to REST polling across 8+ integrated third-party services.

Android Software Developer Intern (Jetpack Compose) — Yazilim.xyz **Aug 2024 – Sep 2024 | Remote**

- Developed a feature-complete Google Calendar clone utilizing Kotlin, Jetpack Compose, and Android Dependency Injection patterns across 15+ core modules and 3 Agile sprints.

KEY ENGINEERING PROJECTS

3D Raycasting Graphics Engine | C, C++, System Programming **2026**

- Engineered a custom 3D perspective rendering engine from scratch using raycasting algorithms in C/C++, translating 2D spatial matrices into real-time navigable 3D environments with optimized memory management.

Nano Space – Orbital Data Analysis Platform (R&D) | Web Architecture & Data Systems **2025**

- Designed software architecture and relational database schema for a web platform interpreting satellite telemetry and orbital datasets to determine material composition.

Real-Time Restaurant & Order Automation System | Flutter, .NET Core, WebSockets **2025**

- Built a multi-user order processing and inventory system supporting 100+ concurrent connections and 500+ daily transactions, reducing manual order processing time by 45%.

EDUCATION & ACHIEVEMENTS

Anadolu University – B.S. in Management Information Systems (MIS) **2024 – 2026**
Ecole 42 (42 Istanbul) – Software Engineering & Systems Programming (C/C++) **2022 – 2024**
Istanbul Esenyurt University – A.S. in Computer Programming **2020 – 2025**

- **3rd Place Winner (Team Captain) – Bilişim Vadisi Web Technologies Hackathon (Dec 2025):** Led a 4-person engineering team to 3rd place among 50+ competing teams (~200 developers).
- **Technical Mentor:** NASA Space Apps Hackathon (2025) & 42 Istanbul Systems Programming (2024).
- **Languages:** Turkish (Native) | English (Professional Working Proficiency)
